

CLOSE-UP MACRO LENSES

USER'S MANUAL

Limited One Year Warranty

Altura Photo warrants this quality product to be free of defects in material and workmanship for a period of one year from the date of purchase. During the period, Altura Photo will repair or replace the product at no charge for parts or labor.

TIME PERIOD OF THIS WARRANTY

The time period of this warranty starts from the date of the original purchase and expires on the first anniversary date of purchase.

WHAT IS NOT COVERED BY THIS WARRANTY

No expressed or implied warranty is made for any defects in this product which result from accidents, abuse, misuse, failure to operate the product in accordance with relevant instructions, neglect, immersion or exposure (to chemicals, liquids, extreme climate or fungus), excessive wear and tear/ cosmetic damage, or any defects resulting from other extraneous causes (such as unauthorized disassembly, repair or modification).

This warranty shall not be extended to any incidental or consequential damages arising from the purchase even if Altura Photo has been advised of them.

The laws of some countries and States do not allow the limitation of incidental or consequential damages meaning that the above limitation or exclusion may apply to you.

WHAT TO DO WHEN SERVICE IS NEEDED

STEP 1. Package the product and relevant accessories carefully, using ample padding materials and a sturdy mailing container to prevent damage in transit.

STEP2. Include in package:

- a) Evidence of date and place of original purchase (for example, a copy of your sales receipt).
- b) Detailed description of your problem.
- c) When possible, a sample evidencing the problem.

STEP3. Return item (insured) to: (in the U.S.):

7239 NW 33RD STREET / MIAMI, FL 33122 / U.S. / GOJA, LLC

When service is complete, the product will be returned to you through prepaid shipping. In the event that the product is deemed to be not faulty or had a defect as a result of wear and tear, Altura Photo may levy a handling charge for the return of the product. This warranty gives you specific legal rights. You may also have other rights which vary from country to country, and State to State. For more information, visit our website www.alturaphoto.com.

E-mail us at info@alturaphoto.com and one of our technical support team members will answer your questions. For phone support in the US, please call (786)443-2898. If you would like to call from anywhere else, please visit www.alturaphoto.com for your local toll free number.

Introduction

Thank you for purchasing the Altura Photo Close-Up Macro Lens Set. This lens set is perfect for close up photography because it allows you to hold your camera's lens closer to the subject than ever before. In order to get the best results when using your lenses, please read this manual first.

Note

This lens set is available in sizes from 37mm-82mm. The size of your lenses is listed on the item's packaging and also on the lenses themselves.

Included With Your Lens Set

The following parts are included with your set:

FOUR CLOSE UP LENSES

Your Close-Up Macro Lens Set includes +1, +2, +4 and +10 close up lenses. These lenses can be used individually or in combination to achieve the effect of your choosing.

WALLET CARRYING CASE

You can safely store your lenses in the included wallet style carrying case. This case protects your lenses from scratches and its velcro seal makes it easy to carry around for maximum portability.

Using Your Close Up Macro Lenses

In order to best use your lenses, please follow the steps below:

1. Depending on how much magnification is required, choose which lens you should connect to your current lens. Included with this set are +1, +2, +4, and +10 lenses. The +1 lens offers a moderate amount of magnification, while the +10 lens offers more substantial magnification. Your lenses each have front and rear lens threading so that they can be attached to each other or to your camera. To gain even more magnification, you can attach multiple lenses. For example, if a +1 and +2 lens are attached together, they will provide +3 magnification. A +4 and +10 lens will provide +14 magnification.

2. Once you choose which of the included lenses you want to use, you can attach the lens of your choice to your camera. Your lenses all have a lens threading which should allow them to screw directly onto your camera's lens. On the packaging of your lens set, the diameter of your lenses (in mm) is listed. Make sure that this diameter matches the diameter of your camera's lens, or additional adapters may be required to connect your lenses to your camera.

3. Once your lenses are attached to your camera, you will see how they allow you to zoom closer to the subject you are photographing, achieving a larger image scale.

Important Notes

-Make sure that your camera is in manual focus mode when using these lenses.

-The depth of field will become narrower at higher magnifications. Set your aperture accordingly and try to provide as much lighting as possible. A ring flash or an external flash that has a slave mode may be useful. Use caution when using your camera's on board flash because it will likely produce a shadow from your camera's lens.
